

--Subjects may also be characterized using symbols representing other system inputs, including (for example) educational backgrounds, geographical locations, company sizes, hierarchical positions, and preferences. Thus, for example, the symbolic representation {M1, M5, MBA, MSME, CT, F500, CMO, P-CT, P-PV, P-TECH} could be used to represent a marketing manager with experience in the consumer package goods and consumer software industries, who has an MBA and an MSME degree, who has worked in Connecticut at a Fortune 500 company, and risen to the Chief Marketing Officer hierarchical level; and who has preferences for jobs in Connecticut, at private companies, in the technology sector.--
